

'Thor' - Even the vets dogs get themselves into trouble

Thor came to live with Nicole and Al when he was only 6 days old, could fit in the palm of your hand and needed to be fed around every two hours. Nearly two years later Thor has grown into a strapping Neapolitan Mastiff weighing an impressive 67kg.

Thor is renowned for eating anything that fits in his mouth - from 100's of socks to jewellery and unfortunately, it was only a matter of time before something refused to pass all the way through.

After a few days of vomiting and no suspicious objects passing, Nicole realised this time was different. X-rays were taken that showed a foreign body in Thor's stomach and something questionable in his intestines so the decision was made to go in for a look.

A large rope toy with three knots was found in the stomach and stuck around it was a pair of lacey underwear that had already passed into the intestines.

Thor has recovered well and is already showing interest in Nicole's new socks!

'It's one of those career defining moments to pull out your own underwear from the intestines of your own dog' Dr Nicole Mace
